

Environmental policy

We offer environmentally friendly products.

- We offer high-quality and energy-efficient products, system solutions, and services that contribute to the transition toward a more sustainable society.
- We take responsibility for our environmental and climate impact on all levels.

We use natural resources efficiently.

- Our business is characterized by efficient use of energy, water, raw materials, and other natural resources.
- We work to ensure that our production facilities use renewable energy and reduce the climate footprint.
- We work for the recycling of residual products and end-of-life products.

We monitor and comply with laws and regulations.

- Our operations are conducted in such a way that laws, regulations, and contractual requirements in the environmental area are complied with.
- We have an environmental management system that is certified according to ISO 14001.

We work with continuous improvements.

- We work preventively, systematically, and target-oriented in the environmental area through regular follow-up and reporting.
- We develop our operating systems to identify improvements in our environmental performance.
- Through training, information, and monitoring of the environment, we ensure our employees' competence and commitment.

We reduce emissions and minimize risks.

- We work continuously to reduce waste and landfill from our production.
- We work systematically with our environmental aspects to protect, reduce, and prevent land, air, and water pollution.

We set demands in our value chain.

- We place relevant environmental requirements on our suppliers' systematic environmental work.

We are transparent in our information.

- We report openly and objectively our development in the environmental area. We do this in accordance with established international guidelines in the field of sustainability.
